

## Revocation of 2G rule for studying

Dear students and colleagues,

As you may have heard, an amendment to the [15th Bavarian Regulation on Infection Prevention and Control Measures \(BayIfSMV\)](#) was passed on 17 February 2022. The repercussions for us at THN are as follows:

- With immediate effect, the 3G rule will apply when entering buildings, in other words you have to be either vaccinated, recovered, or have a negative test. If you are neither fully vaccinated nor recovered (according to the RKI definition), you need to be able to show a valid, negative test taken no more than 24 hours previously (PoC-Antigentest) at an official testing facility.
- The implementation and participation of an in-person lecture or course is only permitted to persons who fulfill the 3G rule.
- The 3G rule also applies to all internal events as well as to events held by external persons with the event purpose of professional education and training on the premises of the University.
- The requirement to collect contact information no longer applies.

Please note that the rules may still change frequently over the coming weeks. We will of course write to keep you up to date. Please also check our website about the currently valid rules.

Sincerely,

Christina Zitzmann
