How can I identify Copilot of the Ohm

The “Work” label appears in the bottom-left corner. This means you are signed in with your university account and are using TH Nürnberg Copilot.

The shield icon in the top-right corner indicates that enterprise data protection is active. You should therefore use this protected work environment whenever possible for university- or study-related content.

Important: TH Nürnberg’s data protection and usage policies still apply here. Particularly sensitive or personal data should not be entered into AI tools.
